

KUNPARA HARSHKUMAR LALITBHAI

Anand, Gujarat | +91 9924092704 | harshkunpara742@gmail.com

Portfolio | LinkedIn | GitHub | LeetCode

EDUCATION

Chandubhai S. Patel Institute of Technology (CSPIT)

Bachelor of Technology (B.Tech) in Information Technology — 2nd Year

Anand, Gujarat

Expected Graduation: 2029

TECHNICAL SKILLS

Languages:	C, C++
Core Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)
Web Technologies:	HTML, CSS, React.js, Next.js, Node.js, Express.js
Databases:	MySQL, MongoDB
Tools & Platforms:	Git, GitHub, Vercel

KEY PROJECTS

Skillora — AI-Powered Learning Platform

Full-Stack Development

[GitHub](#) • [Live Demo](#)

- **Full-Stack Architecture:** Engineered an end-to-end AI-powered learning management software using React.js for modern component rendering and Node.js/Express.js for microservice processing.
- **Authentication & Security:** Implemented secure user authentication algorithms alongside custom robust search indexes to index multi-tiered technical courses.
- **Database & Scale:** Designed scalable, object-relational schemas in MongoDB; systematically structured query logic to minimize database retrieval overhead.
- **Deployment:** Configured a cloud-native deployment model utilizing custom responsive layouts across screen viewports, improving retention scores.

Aivora — Premium AI Assistant Platform

Frontend & Database Engineering

[GitHub](#) • [Live Demo](#)

- **Framework Optimization:** Architected a high-performance interactive artificial intelligence workspace layout implementing Next.js, React.js server-side structures, and MongoDB cloud storage.
- **State Flow & UI:** Developed **scalable and modular** frontend architecture to support smooth multi-session authentication workflows.
- **Interface Engineering:** Translated modern AI-focused user experience principles into lightweight semantic components, maximizing platform responsiveness, web accessibility, and performance metrics.

ACHIEVEMENTS & COMPETITIVE EXPERIENCE

- **Algorithmic Problem Solving:** Programmed solutions for over **50+ complex Data Structures & Algorithms (DSA) problems** across arrays, strings, and runtime optimization paradigms on LeetCode.
- **Hackathon Competitive Record:** Participated in 10+ national-level hackathons, securing 2+ shortlist selections.
- **Product Prototyping:** Conceptualized, coded, and successfully launched **5+ multi-tier full-stack production web applications** leveraging modern modular toolchains.

PROFESSIONAL CERTIFICATIONS

- **Google Certification:** AI Fundamentals — Verified Academic Specialization via Coursera.
- **Microsoft Certification:** Object Oriented Programming with C++ — Technical Competency Endorsement via Coursera.
- **Indian Space Research Organisation (ISRO):** Advances in Remote Sensing Data Analysis Techniques for Geological Applications.
